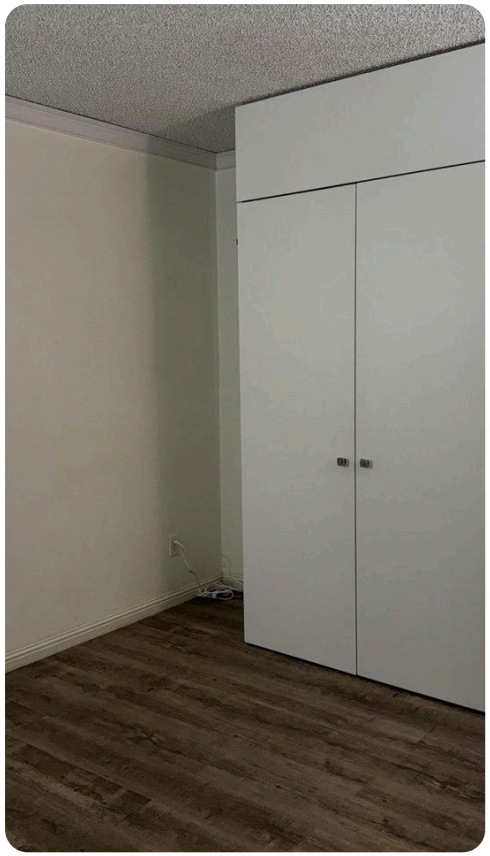
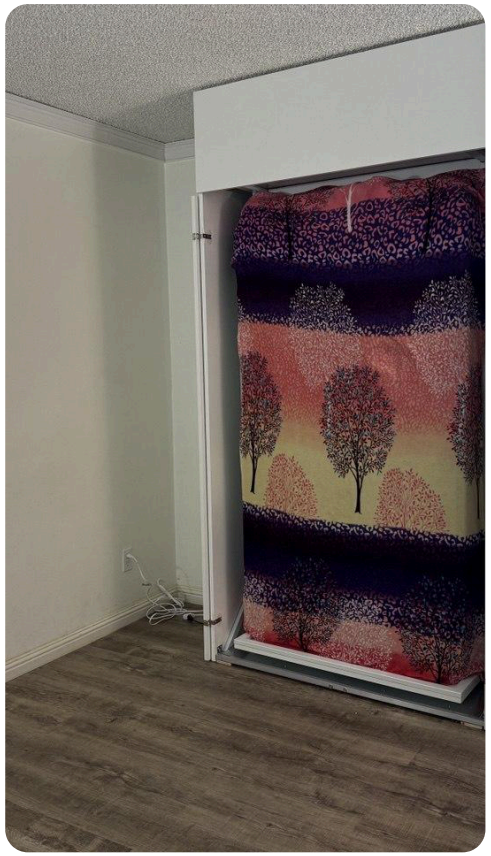
A-BED

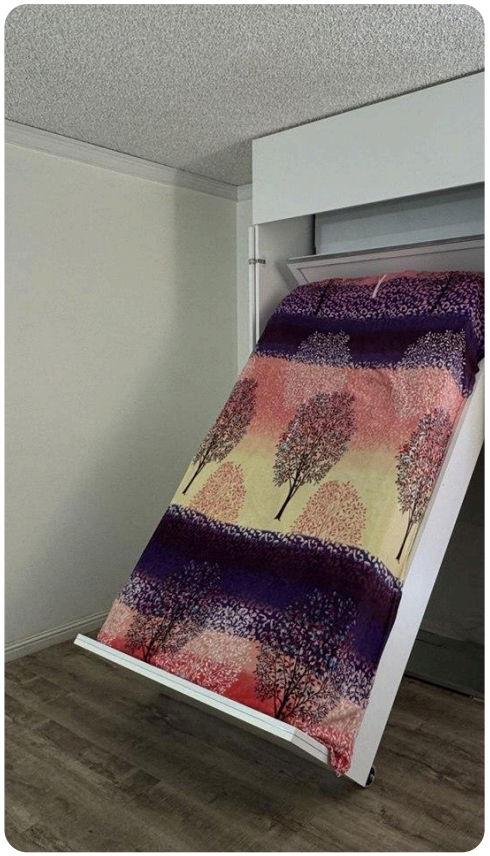
Automatic anti-gravity wall bed and spinal traction device in one — with remote control.



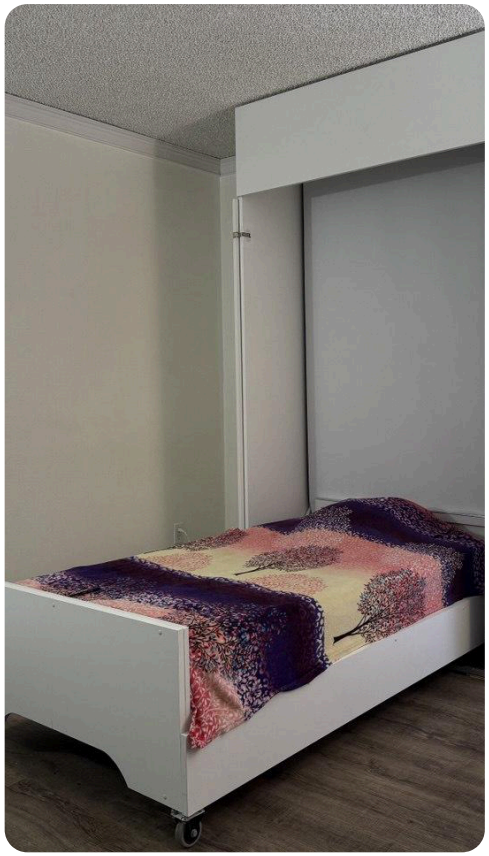
1. Closed — a wardrobe



2. Doors open



3. The bed lowers by remote



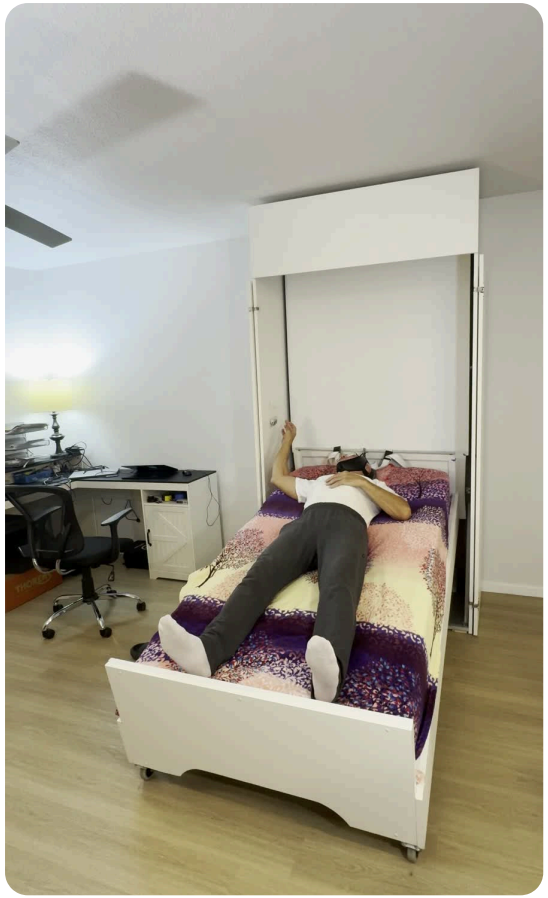
4. Ready to sleep

Made in USA

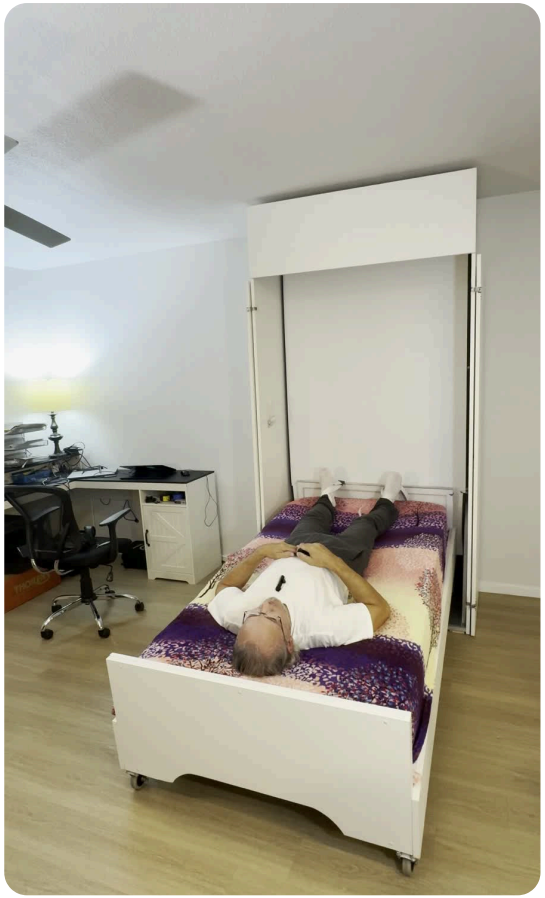
Remote control

Neck and leg traction

Traction at home: neck and legs



Neck traction with a Glisson loop



Leg traction — lie with your feet at the head end

Why A-BED

- Relieves the compression of the spine that builds up during the day.
- Reduces the effect of gravity on your height.
- Helps keep correct posture with regular use.
- Relaxes neck and back muscles after physical activity.
- Speeds up back recovery after intense exercise.
- Takes little space and folds automatically.

The bed tilts to about 20°. Start with 5 minutes and gradually go up to 15–20 minutes.

Description and options

Basic model No. 1

- Single bed (Twin): 79 × 39.5 × 18.5 in, 8-in mattress.
- Double-door wardrobe: 94.75 × 75 × 24.5 in — the bed folds into it automatically.
- Two remote controls included.
- Power: 110 V (cord included).
- Production time for the basic model: about two months.

Made to your order — size, material, color, weight capacity and design.

Options: mattress firmness and thickness, massage mattress, memory foam pillow, custom Glisson loop, arm support device, lumbar extension device.

Design examples: shabby chic, natural wood, English style
